# Hii,I'm Sanchi Goyal

## I'm An Aspiring Developer

Welcome to my Portfolio! I'm passionate about solving problems with code and always exploring new technologies. I'm currently working on academic and personal projects using Python, C++, and MATLAB, while also learning Java by building small applications. I'm improving my frontend skills with HTML and CSS, and deepening my understanding of object-oriented programming, advanced C++ concepts, and data structures. Additionally, I'm exploring Git, GitHub, and collaborative workflows to enhance my version control practices.

# About Me

My journey into web development began with HTML and CSS. As I continued to learn, I gradually diving into JavaScript and front-end frameworks like React. I'm constantly exploring new technologies, and I'm always looking for ways to improve my skills—whether it's learning new CSS properties, refining my coding logic, or mastering version control using Git & GitHub.
